FOREWORD

A warm "Moin" and welcome!

We're delighted to have you join us on our journey through product innovations and trusted classics. As always, we focus on quality and reliability because your safety is our priority.

This year, we're excited to introduce the new **SignMax v11** (page 92). This innovative signage software offers numerous new features to make your work even more efficient and precise. The practical print preview for completed documents displays your results in a convenient popup window – a real advantage for quick checks. The new Print Manager makes color replacement a breeze, allowing you to directly swap out spot colors. Additionally, the intelligent contour-cut function ensures that objects are automatically detected, enhancing user-friendliness.

With the **MultiMax V8** labeling system (page 78), you can achieve significantly higher printing speeds compared to its predecessor. It comes with convenient new features and improved usability, offering everything you need to get started with professional printing and contour cutting.

For any individual concerns or questions, we are always happy to assist you. Thank you for your continued trust, and we look forward to a successful partnership.

Enjoy the read!

Best regards,

Michael Max Meyer
 Managing Director MAX Systems GmbH

OUR ENVIRONMENTAL PROMISE 

MAX Systems produces with **100% green energy**. Most of the plastics for our products are made from recycled materials.

ONE SYSTEM - ENDLESS POSSIBILITIES!

ACCESSORIES

Practical Extension of the Bundle

The LabelMax MP1 comes with an extensive bundle. In addition to the labeling system, a protective bag with magnetic backside is included, as well as ribbon and label material so you can start printing straight away.

Tablet incl. Protective Cover

Our tablet already has the SignMax MP app pre-installed and comes with a robust protective case. If desired, you can order it and get started right away.

Carrying Strap

Do you want to have your hands free while working with the LabelMax MP1? No problem! Thanks to the replaceable back of the LabelMax MP1 bag, the labeling system can be easily attached to a belt or wrapped with the carrying strap. The carrying strap is available separately from us.

FILM CARTRIDGES

Max Premium & Max Premium Plus Films

The vinyl films are cadmium-free and feature excellent resistance to UV light, chemicals and moisture. They are perfect for indoor and outdoor use. The film cassettes are protected by a sleeve so that you always have optimum protection of the material when changing the film.

Max Premium

A highly adhesive vinyl film for extremely long-lasting markings. Max Premium is the perfect film for, for example, plant and machine labeling.

Max Premium Plus

Very strong adhesive vinyl film that adheres excellently to low energy surfaces and also has very good adhesion to lightly soiled surfaces. Ideally suited for permanent markings in harsh environments.

PLOTTER FILMS

Foil Glossy & Matt

Our plotter films have been designed for almost unlimited use indoors and outdoors. Universal processing properties, as well as a large selection of brilliant colours in glossy or matte make them interesting for a wide range of applications – such as vehicle, shop window or sign labels. The film has excellent resistance to UV light, chemicals and moisture and is coated with a permanently adhesive.

Foil Frosted Glass

The semitransparent foil is an optimal visual protection, or glass decoration for indoor and outdoor use. The semitransparent tape protects against prying eyes and is nonetheless permeable to daylight.

BLANK SIGNS

Nose & Flag Signs

A great advantage of the nose and flag signs is that they can be recognized quickly and clearly. Due to their shape, they protrude freely into the room and are therefore quickly recognizable from many sides as well as from a distance. The flag signs are suitable for wall and ceiling mounting. The nose shields are clearly visible from all sides and are suitable for wall mounting.

Advantages at a glance:

- Light but at the same time extremely stable plastic with a thickness of 1.5 mm
- To be attached to the wall or ceiling
- With standard drill holes
- Delivered blank (unprinted)

LOTO LOCKOUT / TAGOUT

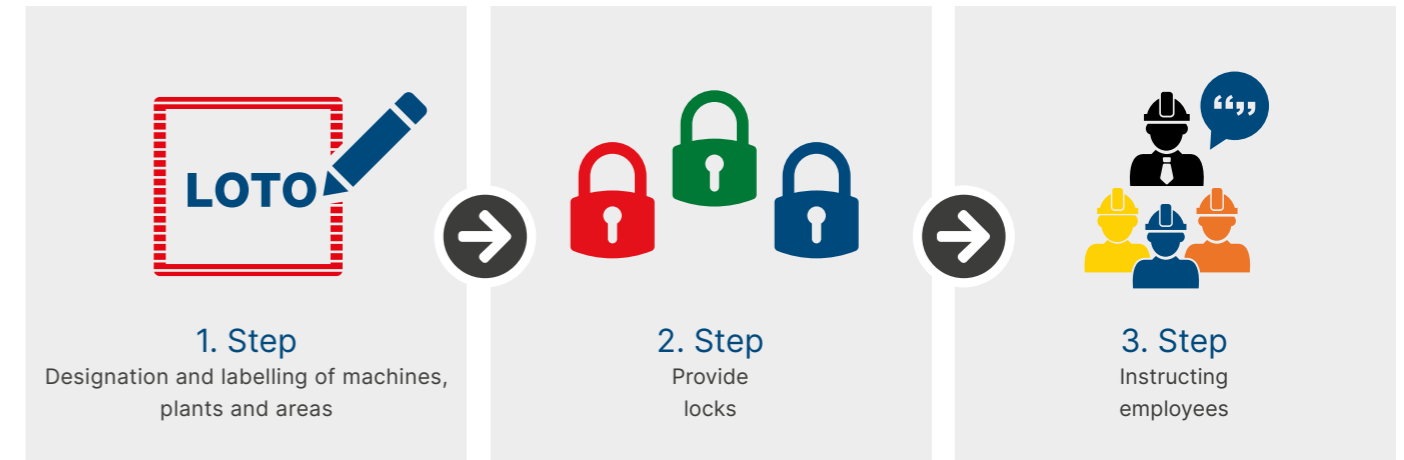

**FINALLY!
EASY. CHEAP. SAFE.**

Free LOTO MSL 1.1 Guide available for download as a PDF!

Or at maxsystems.de/lo-to-msl-1-1-standard

In 3 Steps to a Secure LOTO System According to MSL 1.1 Standard:

What is LOTO?

LOTO is the abbreviation of Lockout Tagout, in English „lock and tag“. Lockout Tagout stands for the secure locking and Taging of energy sources during the maintenance and repair of machines and equipment. It was developed in the US, where the number of accidents at work has already been reduced by over 70% thanks to LOTO. Lockout Tagout is becoming increasingly popular in Europe too.

You want to introduce simple MSL 1.1 standard in your company? We are happy to advise you! Just talk to us.
Phone: +49 (0) 47 63 / 945 950 Mail: info@maxsystems.de

What is the MSL 1.1 Standard?

The MSL 1.1 standard was developed by MAX Systems to simplify the introduction of a secure lockout tagout system. According to our standard, the start in a LOTO system can already be made with three locks. The use of different closing locks avoids accidents resolving from the incorrect removal of locks, since it is not possible to switch on the system until every employee has removed their lock. The clear labelling of systems and energy points according to MSL 1.1 is the cornerstone of a successful and secure LOTO concept. It ensures understanding and avoids errors during use. A successful implementation of the concept requires training of all concerned employees. Due to the simple system, this can be done in a maximum of 30 minutes.

PADLOCKS MASTER LOCK

INFO:

As standard we offer all locks with the locking system "Various locking".

Upon request, we can also provide them with the "Keyed alike" and "Different keyed with master key" or a grand master key locking systems.

Locking systems explained simply:

Various locking (Different keyed): Each lock can only be opened by a unique key that does not fit any other lock in the series.

Keyed alike: Each padlock has a key, and all keys are the same, opening any lock in the group.

Different keyed with master key: Each lock has a unique key, and the master key can open all locks in the system.

Aluminium MasterLock Locks:

The MasterLock Lock series S1100 & A1100 have an anodized aluminum housing and are resistant to chemicals and extreme temperatures. Due to their corrosion-resistant surface, they are ideally suited for use in harsh environments. Due to the long-lasting bright colour of the locks, they are also easily visible and provide a high level of security.

MULTIPLE LOCKING BRACKETS

Multiple locking brackets are an effective component of multi-person locking. By installing a bracket, several employees can lock a system with their padlock at the same time. The system can only be switched on again when the last employee has removed his lock from the lock bar.

IDEAL FOR MACHINES WITH ONLY ONE ENERGY POINT.

For machines with only one energy point, a multiple locking bracket is the ideal locking option according to MSL 1.1!

GROUP LOCKING BOXES

Our group locking boxes are the perfect solution for a LOTO system according to MSL 1.1 standard. When using the boxes according to MSL 1.1 standard, the keys of the red locks are stored in the group locking boxes. The box is in turn locked with the green signal lock and each employee can attach his or her individual lock to the box. The keys in the box can only be accessed once the last employee has removed his padlock from the box.

IDEAL FOR MACHINES WITH MORE THAN ONE ENERGY POINT.

END FLANGE LOCKING

The closing flange lock completely covers the flange bolts. This prevents access to the aperture until all work on the line has been completed.

The adjustable parts of the locking system allow a secure fit and cover the nuts with which the panels are attached. An exact fit is ensured by the adjustable parts of the locking system and can therefore be used for several flange connections.

NOTE:
Flange and valve covers protect employees from the release of hazardous liquids and gases. Available upon request from us as well.

ELECTRICAL LOCKING

The risk of dangerous accidents involving electrical installations is high. To avoid this, we offer a wide range of locks that make the power supply inaccessible during maintenance and repair work. This allows the work to be carried out in peace and without disturbances. The locks block electrical shutdown points, wall switches, plug connections and other devices.

We have special padlocks for circuit breakers, circuit breaker locking for large and standard switches, D-safety locks for screw locks, mini circuit breaker locks and locking for electrical connectors in our assortment.
