SPECIAL-FILM PRINTABLE TEXTILE FILM

LabeltexMax SP3 - Film for hot transfer

LabeltexMax is a universal film specially developed for use on various textiles. With this high-quality and durable film, any design can be easily and quickly printed on any type of textile. Note: TranstexMax, the necessary transfer film for textile films, is sold separately. See page 89.

Specifications: Film for hot transfer, matte

Ribbon: Max Premium ribbon

- $\cdot \ \, \text{Developed for application on all types of textiles (cotton, polyester, acrylic, nylon)}$
- \cdot Application in low temperature mode (120°C only 20 seconds)
- · Quick application mode: Only 5 seconds contact with heating plates.
- · OEKO-TEX product class 1

CABLE AND TUBE MARKERS

Cable marker made of self-adhesive, transparent foil for printing or self-inscribing in different colours. Self-laminating, easy to handle and high adhesion. The transparent area protects the text and offers a high resistance to abrasion, dirt and solvents. Ideal solution for labeling wires and cables.

ACCESSORIES

Practical Extension of the Bundle

The LabelMax MP1 comes with an extensive bundle. In addition to the labeling system, a protective bag with magnetic backside is included, as well as ribbon and label material so you can start printing straight away.

Tablet incl. Protective Cover

Our tablet already has the SignMax MP app pre-installed and comes with a robust protective case. If desired, you can order it and get started right away.

Carrying Strap

Do you want to have your hands free while working with the LabelMax MP1? No problem! Thanks to the replaceable back of the LabelMax MP1 bag, the labeling system can be easily attached to a belt or wrapped with the carrying strap. The carrying strap is available separately from us.

Item No.		Description	Price/Pc.

Film for hot transfer

LabeltexMax is a universal film specially developed for use on various textiles. With this high-quality and durable film, any design can be easily and quickly printed on any type of textile.

- · Developed for application on all types of textiles cotton, polyester, acrylic, nylon
- · Application in low temperature mode 120°C only 20 seconds.
- Quick application mode:
 Only 5 seconds contact with heating plates.
- · OEKO-TEX product class 1

Hint: **TranstexMax**, the necessary transfer film for textile film, can be found on page 89.

SignMax v11

THE EASY SIGN SOFTWARE

Objects are automatically detected, and you can manually adjust

Choose between the classic user interface or a modern look,

them if necessary – perfect for precise work.

· Flexible Design

including light/dark mode.

SIMPLE SIGNDESIGN QUICKLY & WITHOUT PRIOR KNOWLEDGE - WITH THE ASSISTANT "WIZARD"!

The SignMax v11 is a powerful and easy-to-use signage software that perfectly combines creativity and user-friendliness. With its intuitive interface and smart features, such as the design assistant "Wizard," you can create signs and labels quickly, effortlessly, and cost-effectively – no prior experience required.

The new printmanager impresses with innovative features like a smart preview function, color exchange, intelligent contour-cut technology, and a flexible user interface, including light/dark mode. SignMax v11 is the perfect solution for your business, lab, or office to create custom signage in-house. Even employees without prior knowledge of safety signage can quickly acquire the necessary skills and techniques to easily implement them on their own.

The SignMax software is also available as a server version!

Just talk to us. We will be happy to advise you.

· Large Pictogram and ClipArt Library

With many sign templates and safety markings.

· Design assistant "Wizard"

For simple sign design without previous knowledge.

· Free Pictogram and ClipArt Updates

New pictograms always according to the latest standards and requirements.

· Free Live Support

If you have any questions, please do not hesitate to contact us.

· Free SignMax Workshops

All over Germany, online or on site. Spend an informative day with us in a relaxed atmosphere.

BLANK SIGNS

Nose & Flag Signs

A great advantage of the nose and flag signs is that they can be recognized quickly and · Light but at the same time extremely staclearly. Due to their shape, they protrude freely into the room and are therefore quickly recognizable from many sides as well as from a distance.

The flag signs are suitable for wall and ceiling mounting. The nose shields are clearly visible from all sides and are suitable for wall mounting.

Advantages at a glance:

- ble plastic with a thickness of 1.5 mm
- · To be attached to the wall or ceiling
- · With standard drill holes
- · Delivered blank (unprinted)

In 3 Steps to a Secure LOTO System According to MSL 1. 1 Standard:

What is LOTO?

LOTO is the abbreviation of Lockout Tagout, in English "lock and The MSL 1.1 standard was developed by MAX Systems to simplify

sources during the maintenance and repair of machines and equipat work has already been reduced by over 70% thanks to LOTO. Lockout Tagout is becoming increasingly popular in Europe too.

You want to introduce simple MSL 1.1 standard in your company? We are happy to advise you! Just talk to us.

Phone: +49 (0) 47 63 / 945 950 Mail: info@maxsystems.de

What is the MSL 1.1 Standard?

the introduction of a secure lockout tagout system. According to Lockout Tagout stands for the secure locking and Taging of energy our standard, the start in a LOTO system can already be made with three locks. The use of different closing locks avoids accidents rement. It was developed in the US, where the number of accidents solving from the incorrect removal of locks, since it is not possible to switch on the system until every employee has removed their lock. The clear labelling of systems and energy points according to MSL 1.1 is the cornerstone of a successful and secure LOTO concept. It ensures understanding and avoids errors during use. A successful implementation of the concept requires training of all concerned employees. Due to the simple system, this can be done in a maximum of 30 minutes.

Explanation of Symbols:

PADLOCKS ABUS

76 ABUS Locks:

The 76 lock series features a solid aluminum body with plastic coating in various colours. It's lightweight, yet sturdy and durable. With its 9 different shackle variants, this lock is extremely flexible for various applications. Additionally, with the world's first 8-pin cylinder, it guarantees over 200,000 different key combinations.

SCAN ME & ORDER ONLINE!

shop.maxsystems.de/LOTO/ Vorhaengeschloesser/ABUS/

Weather-resistant and suitable for environments with special liquids/substances, thanks to its stainless steel shackle.

76/40

Suitable for use on sensitive equipment protects against scratches and provides electrical insulation.

76PS/40 "The electrician's lock" - thanks to its nonconductive properties.

76/40CAB The all-rounder for versatile applications. No rigid shackle - ideal for tight areas or multiple locking points.

Choose the desired color for your padlocks:

When ordering, you can simply set the color abbreviation be-hind the Item No., e. g. 305442RED

Explanation of Symbols:

MULTIPLE LOCKING BRACKETS

Multiple locking brackets are an effective component of multi-person locking. By installing a bracket, several employees can lock a system with their padlock at the same time. The system can only be switched on again when the last employee has removed his lock from the lock bar.

GROUP LOCKING BOXES

Our group locking boxes are the perfect solution for a LOTO system according to MSL 1.1 standard. When using the boxes according to MSL 1.1 standard, the keys of the red locks are stored in the group locking boxes. The box is in turn locked with the green signal lock and each employee can attach his or her individual lock to the box. The keys in the box can only be accessed once the last employee has removed his padlock from the box.

Examples of Applications

VALVE LOCKING

Valve locks are installed on the valves of the systems during maintenance and repair work. The valve lock encloses the valve handle so that it cannot be operated by other persons. It is ensured that all employees can carry out the work on the plant without complications.

We have screw valve locks, pressure gas valve locks, flap valve locks and ball valve locks in our assortment.

Install more locks easily with a multiple locking bracket!

Examples of Applications

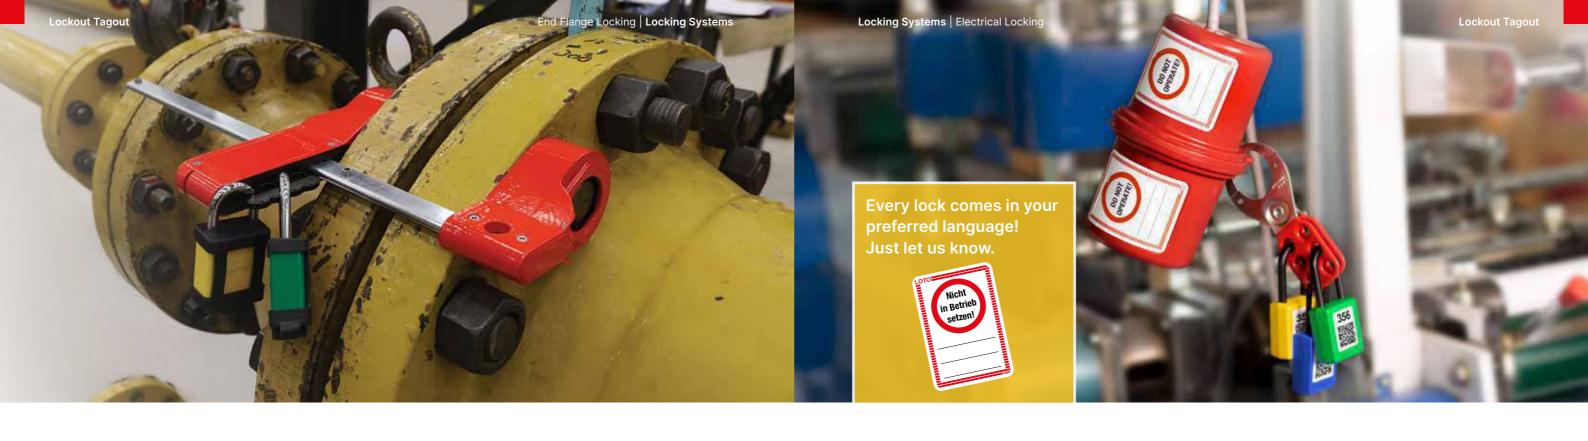

END FLANGE LOCKING

The closing flange lock completely covers the flange bolts. This prevents access to the aperture until all work on the line has been completed.

The adjustable parts of the locking system allow a secure fit and cover the nuts with which the panels are attached. An exact fit is ensured by the adjustable parts of the locking system and can therefore be used for several flange connections.

ELECTRICAL LOCKING

The risk of dangerous accidents involving electrical installations is high. To avoid this, we offer a wide range of locks that make the power supply inaccessible during maintenance and repair work. This allows the work to be carried out in peace and without disturbances. The locks block electrical shutdown points, wall switches, plug connections and other devices.

We have special padlocks for circuit breakers, circuit breaker locking for large and standard switches, D-safety locks for screw locks, mini circuit breaker locks and locking for electrical connectors in our assortment.
